file. The exception came on Monday when the group was unable to participate in a four-team, five-set match. In that instance, Connecticut won a 3-1 decision in the third round of the DIAA Tournament. The Huskies will host a dual match on Sunday afternoon at 2:00 against Mercer.

Q: How to find the last record in the database based on an order I have a table name "employee" which has a field named "hireDate" The date is set to insert to a value. I want to select the last record of an employee so that the last hireDate is not later than 30 days from the current date. A: You can use something like this: SELECT * FROM employee ORDER BY hireDate DESC LIMIT 1 But notice that if you do not specify a value for the order parameter, then you will end up selecting the latest record. If you want the oldest record, you have to reverse the order, as explained here:

-fluorocapronylcarnitine (RF3CC) without any significant effects on the plasma levels of total carnitine and lysine, the recommended dose for adults is 600 mg/kg/day orally for 3 to 5 days.[@b15-dddt-12-2223] Apart from that, in a study in 52 healthy volunteers, 13,000 mg/day of RF3CC were administered for 7 days and the mean plasma RF3CC was 1.93 μM. RF3CC showed some preclinical toxicity in a single dose experiment (>100 mg/kg, mice) and a longer administration of 30 mg/kg for 7 days in mice also showed some toxicity.[@b16-dddt-12-2223] More recently, a multicenter, randomized, controlled, double-blinded, parallel-group, placebo-controlled study of RF3CC at the recommended dose of 600 mg/kg/day administered orally for 3 days in patients with Friedreich ataxia (n=20) showed its safety and tolerability. However, there was no significant improvement in the ataxic symptoms compared to placebo and also the dose could not be escalated up to 6 g/kg/day for 4 days in this study.[82157476af
